

## Welcome to 4th Grade

Hello 4th Grade parents and students. Welcome to the 4th Grade! I can't wait to see you in your new classroom when we return to school. Hopefully after a long three months of distance learning, you too will be excited to return. I am positive you are ready for all that we will do in 4th Grade, but first you have to enjoy a well deserved Summer Break.

Over the summer, I have some goals for you. While I am not assigning specific books or time consuming Math, I do have a challenge for you. I would like you to choose to excel daily, and make as many memories as possible. My most important goal for you is to choose your success. In 4th Grade I will ask you to excel in all you do. Whether we are exploring the regions of our country, completing a Science lab or growing in our faith, I expect all students to do their best. This summer, doing your best will include reading, practicing math facts and making memories.

Unfortunately, I have to include a "what if." What if we do not return to the classroom and have to learn online again. If we are unable to return to the classroom after summer break, I am positive we can still excel daily. Ms. Walluck told me all about your hardwork in 3rd Grade. The fact that 3rd graders were successfully working online will make Fourth Grade distance learning a breeze. You already know the format, so we would surely continue to succeed.

Please enjoy your summer. My suggestions for Reading and Math are there to help make 4th Grade as easy as possible. I look forward to all the fun we will have. I can't wait to be your teacher. Remember, choose to excel daily. Be your best everyday! Make as many memories as possible. See you soon!
